THE BUILDER'S SURVIVAL GUIDE:

Educating to Protect

Because purchasing the best available insurance coverage is only the first step, we have created this guide to help educate builders on what additional steps are suggested and necessary to protect them and their operations. While some of these suggestions may seem tedious, if/when a lawsuit is served, they will be appreciated.

OUR HISTORY

In 2018, business partners, Gus Brabham and Bennett Griffin, left the corporate insurance world to start a new firm that was locally owned and independent by nature. The goal was to create a company where a premium is placed on a positive culture, strong relationships and years of experience brought to the table, all of which benefit our clients.

IN ACTION

For over 25 years, we have helped businesses in the homebuilding industry gain access to the best insurance coverages available in South Carolina. We help our clients protect their assets by implementing an insurance and risk management program tailored for builders so that great coverage is matched with proper risk transfer. The end result is better protection and a heightened understanding of what you're paying for.

OUR FOCUS

Our focus is on relationships, partnering with successful regional and national carriers, that also have expertise in the homebuilding insurance space. These carriers are as dedicated as we are about providing clients with the best coverages available and unparalleled service.

Partnership-Expertise-Innovation-Passion-Doing the Right Thing. These are all traits you will find with BGI. We are invested in your success - now and for the long term.

We pride ourselves in being industry specialists with a strong and experienced understanding of what risks a builder faces in today's world. As partners to the homebuilding industry, our value lies in our ability to identify and help fix any loose ends that may leave your company vulnerable.
